

**Drumclip Engineering Solutions**

# The innovation for reliable load securing solutions that work.

# Innovating to solve daily challenges.

We understand the **challenges** you face:

**Load instability**

**Safety hazard**

**Risk of product contamination  
or spill**

**Down-time**

**Lack of smooth flow in operations**

# Anticipating on your demands.

We provide solutions that meet your **needs**:

Product integrity

Efficiency

Operator time optimization

Compliance

**We want to solve those  
challenges and face them  
together.**

**So we provide engineered  
solutions that work smoothly  
in your process.**

Think with you, not for you

# Our approach

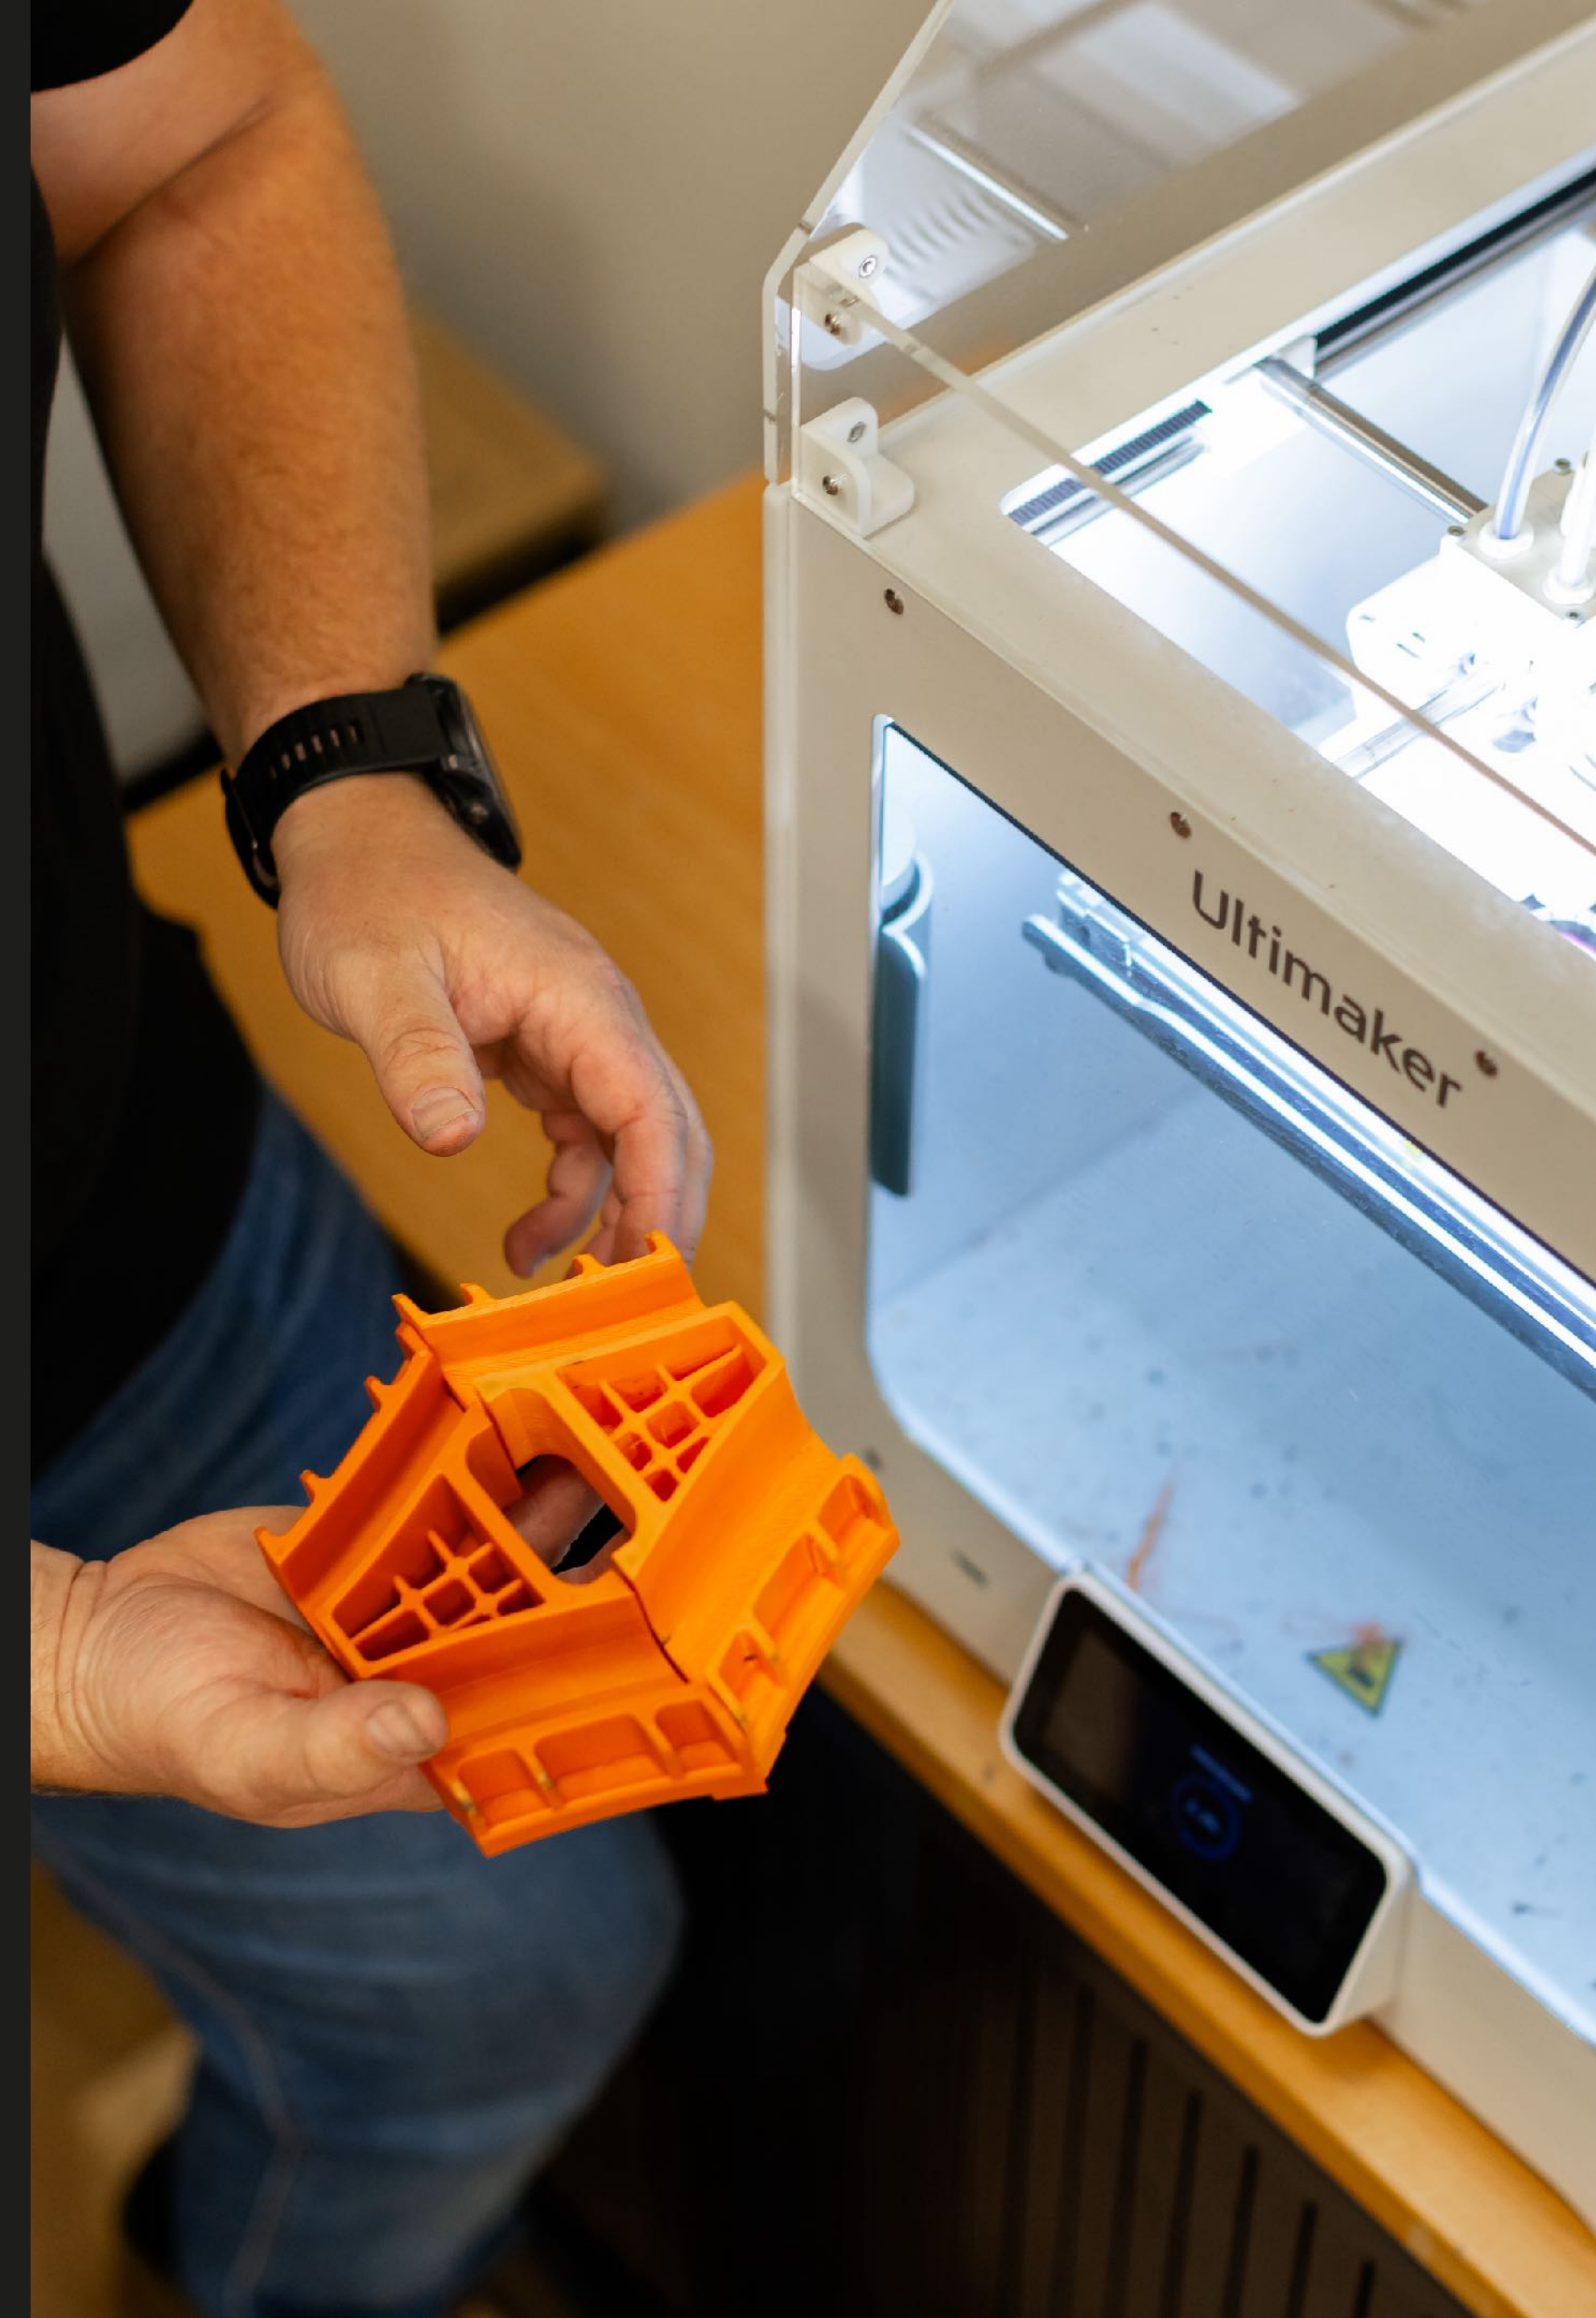

We work alongside logistics and plant managers to integrate smooth, durable and reliable solutions.

We take your problem, analyse it and give it all we've got together with our team and partners.

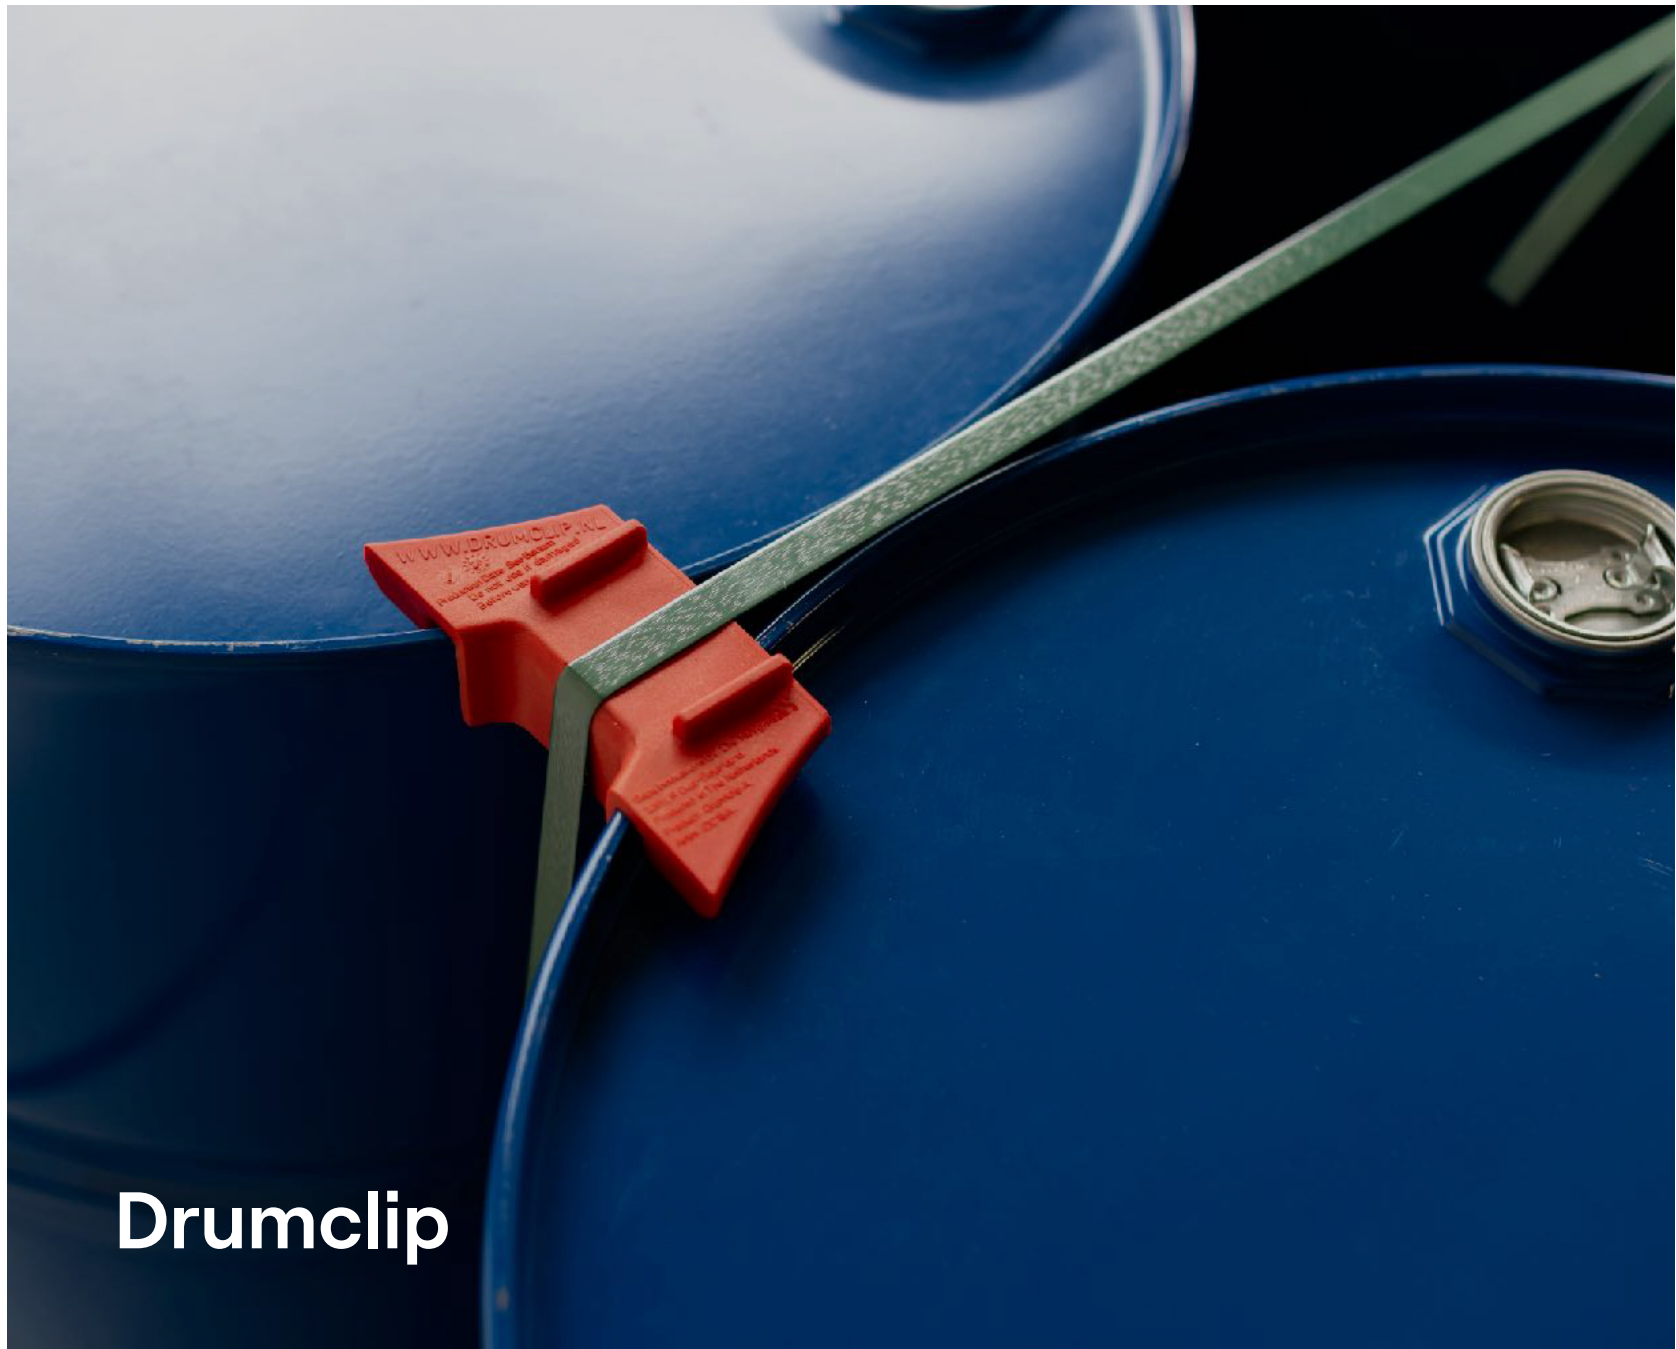

We provide a whole fleet of minds with a hands-on mentality working alongside you, while you can focus on other stuff.

Smart, durable and efficient

# Our solutions

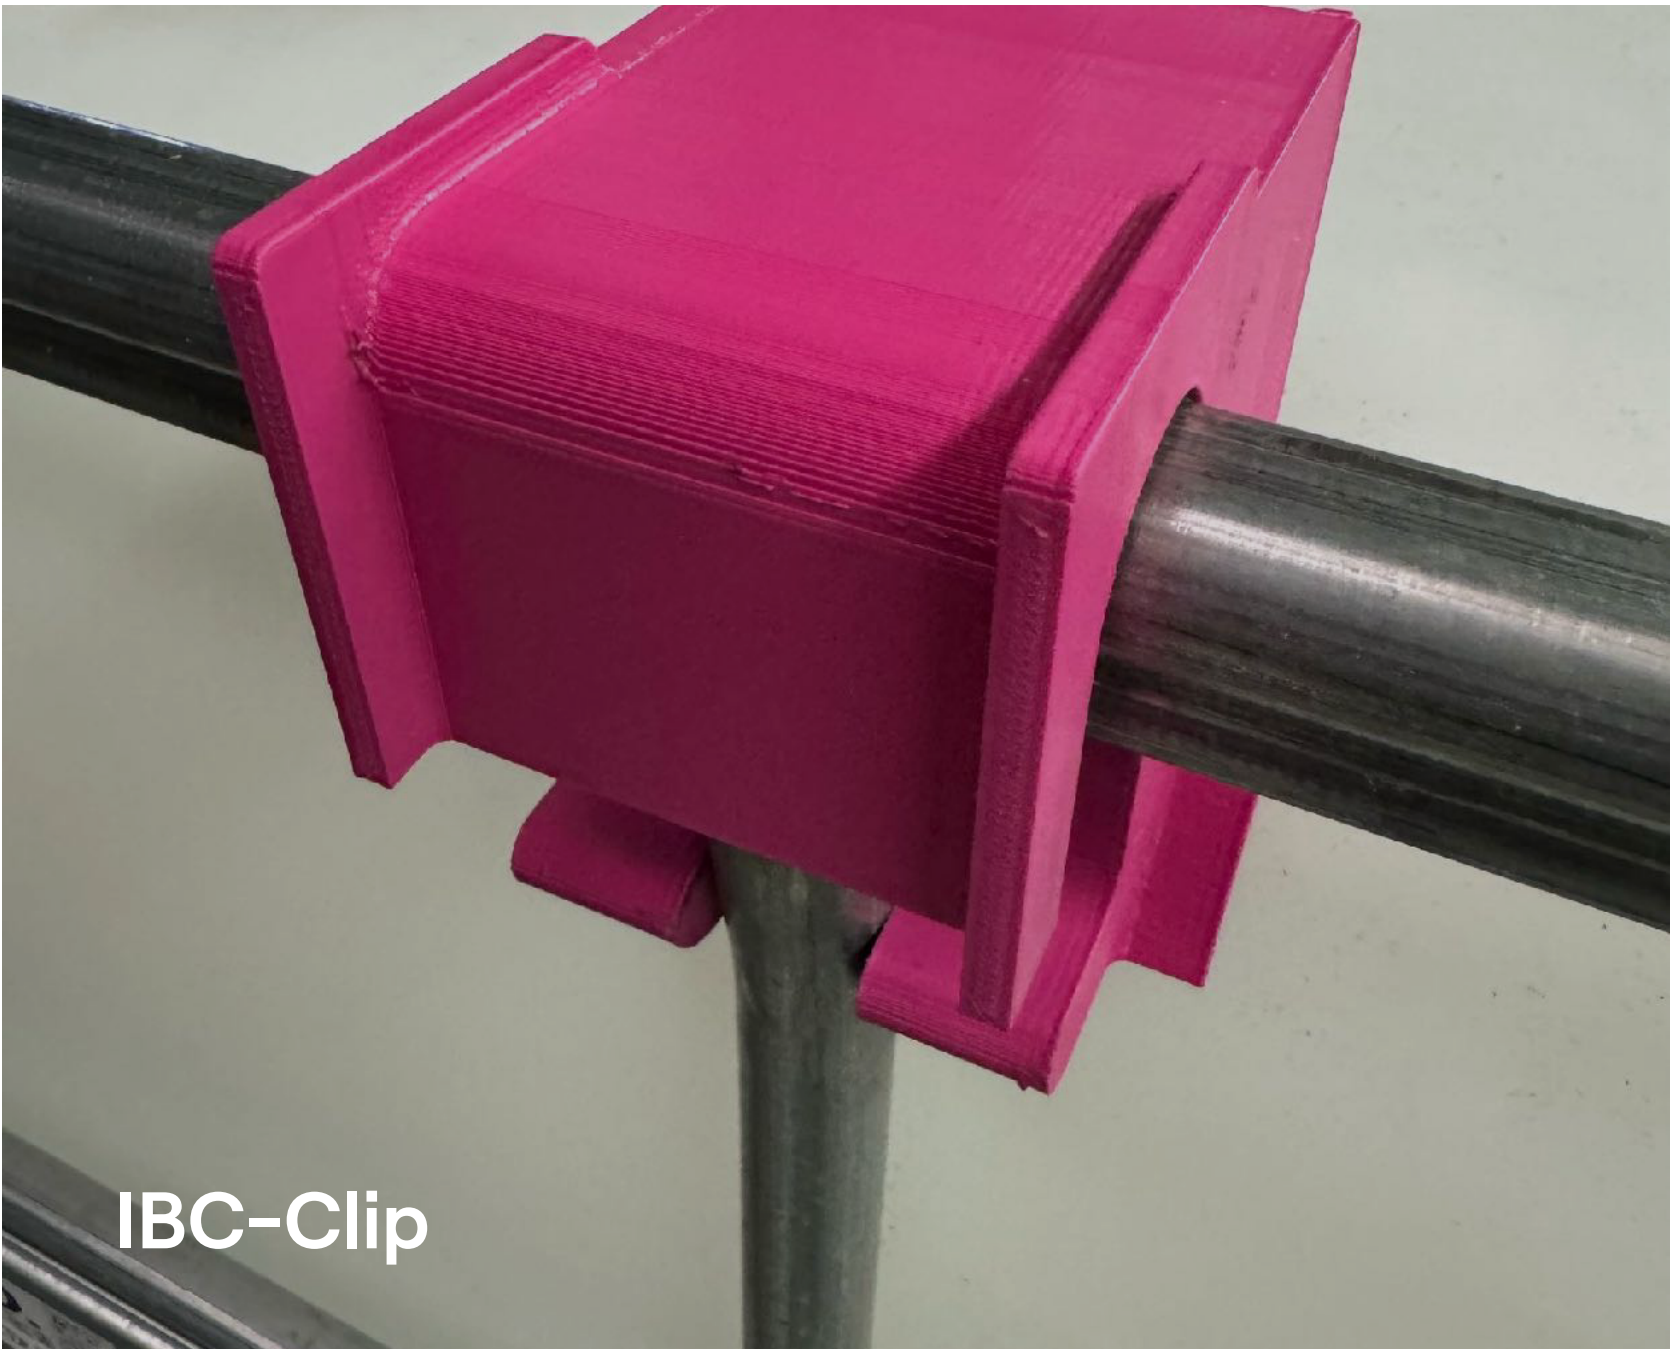

Drumclip

Secure 200L drums (tight-, open head and plastic).

Works with PET strapping, lashing and wrapping.

Reusable, sustainable and easy to apply.

Phase: Certified product

IBC-Clip

Secure Intermediate Bulk Containers (IBCs).

Prevents shifting and improves load safety.

Durable and compatible with existing strapping systems.

Phase: Being fit and tested

DASL

Drumclip Automatic Strapping Line (DASL).

Automated strapping directly on the filling line to cut down manual labor.

Ensures every drum is secured consistently and efficiently.

Phase: Being built to fit pilot case

Engineering daily solutions

# Why it works

## Built for daily operations

Fast, easy-to-integrate solutions that don't disrupt your workflow.

## Durable and high-quality materials

Tested and certified for long-term use.

## Sustainability matters

Reusable up to 2 years, made with recycled materials and wind energy.

## Partnership-driven approach

We work with industry leaders to continuously refine the solutions that support your business.

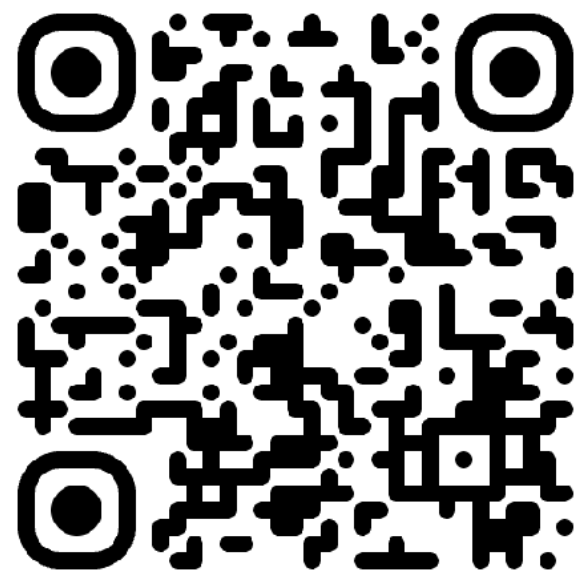

# Let us support your process.

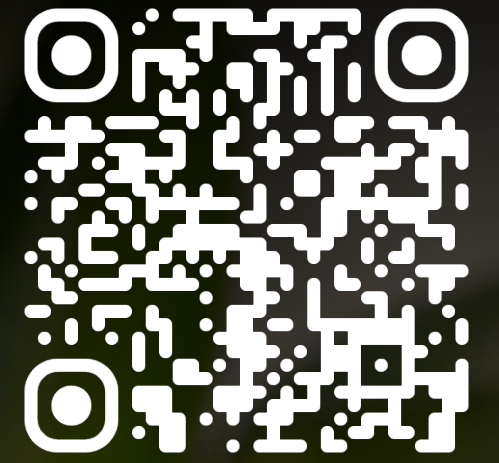

We'd like to solve and innovate together for you.

- ✓ We know the challenges you face.
- ✓ Our solutions integrate seamlessly into your existing logistics and filling lines.
